#### Filing Agent

Is this report being filed by an agent on behalf of a manufacturer or service provider? No

#### Product Labeling

Do all hearing aid-compatible handsets include labeling? Yes

Explain:

Do all hearing aid-compatible handsets that are capable of voice communication over any air interface or frequency

band that does not have hearing aid compatibility technical standards under ANSI C63.19-2007 include the required language disclosing that the handset has not been rated for hearing aid compatibility with respect to such operations?  
Yes

Explain:

Do all hearing aid-compatible handsets that the manufacturer also tested and found not to meet hearing aid compatibility requirements under ANSI C63.19-2011 for one or more operations that are not covered under ANSI C63.19-2007, include language informing users by clear and effective means that the handset does not meet the relevant rating or ratings with respect to such operation(s)?

Yes

Explain:

Do all handsets that are capable of use for Voice over LTE, and that were certified for inductive coupling capability under ANSI C63.19-2011 without being tested for inductive coupling capability over VoLTE, include language disclosing that they were not tested with respect to this operation?

Yes

Explain:

Do all handsets that meet the criteria for an M3 rating by allowing the user to reduce the maximum power for GSM operation in the 1900 MHz band include the required disclosure?

Yes

Explain:

### Public Website

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those models, and an explanation of the rating system? Yes

Website address: <http://www.longlines.com/wireless/phonesfilter.php>

Explain:

### Consumer Outreach

Describe consumer outreach efforts in the past 12 months: Long Lines Wireless maintains a public website displaying its full selection of handsets, including those that are HAC compliant. Existing or prospective customers can determine whether a handset is HAC compliant by consulting with sales personnel, reviewing the packaging and or literature for the handset, or by reviewing the company's website.

### Methodology for Functionality Levels

Functionality A "Smartphones" - Designates handsets that have an operating system (Blackberry, Windows Mobile, Android or other) and provide customers with robust access to the internet and data (over the air or through wi-fi), the ability to run applications and process information on the device.

Functionality B "Multimedia" - designates handsets that allow the customers to access the internet (in a more limited fashion than smartphones), the ability to send and receive multimedia messages, play MP3 or other music or media files, have expanded QWERTY keyboards to improve messaging capabilities or have other features to enable users to access and playback content.

Functionality C "Feature" - designates handsets which are typically lower cost and functionality. Feature phones provide the essential capabilities to talk and text and limited WAP browsing, but do not support advanced applications or support access to wi-fi and robust web browsing.
